Arabic (fluent), English (B1+)

Projects

Hyper Business Solution
Jan 2024 – July 2024

- **Description**: A business solutions website designed with Next.js and Tailwind CSS, featuring 3D models and dynamic animations to showcase services. Includes a user-friendly contact page and content management dashboard.
- **Role**: Lead front-end developer responsible for creating the UI, integrating 3D models using Three.js, implementing animations with Framer Motion, and optimizing performance for better user engagement. Also integrated the front-end with the back-end and handled form validations with Formik and Yup.
- **Technologies**: Next.js, TailwindCSS, Three.js, Framer Motion, RTK Query, Formik, Yup.

Hyper Business Solution Dashboard
July 2024 – Aug 2024

- **Description:** A content management dashboard designed for the Hyper Business Solution website. It supports multiple roles:
  - **Admin:** Full control, including adding and deleting emails.
  - **Content Editors:** Manage and update website content seamlessly.
  - **Customer Service:** Handle and respond to "Contact Us" inquiries efficiently.
  - The dashboard ensures a smooth and secure workflow for managing the website's content and user **interactions.**
- **Role**: Sole front-end developer responsible for designing and implementing the UI, building the entire front-end, and integrating it with the back-end. Used middleware for protected routes to ensure role-based access control.
- **Technologies**: Next.js, TailwindCSS, RTK Query, NextAuth, Formik, Yup, React-Hot-Toast

Hala Nour Elkhier
Nov 2024 - Present

- **Description**: A charitable association website designed to promote and support donation campaigns, featuring bilingual support (Arabic and English). It allows users to interact with the charity's initiatives and make donations seamlessly.
- **Role**: Lead front-end developer responsible for designing the user interface, implementing animations, and integrating the front-end with the back-end. Developed reusable components to ensure maintainable and

scalable code. Secured protected routes using middleware and ensured role-based access control for different routes.
- **Technologies**: Next.js, TailwindCSS, Framer Motion, RTK Query, NextAuth, Next-Intl, Formik, Yup.

Hala Nour Elkhier Dashboard
Nov 2024 – Present

- **Description:** A custom dashboard developed to manage and update the main Hala Nour Elkhier website easily. It supports seamless content editing and addition in both Arabic and English to align with the bilingual nature of the main site. The dashboard ensures effortless management of donation campaigns, initiatives, and user interactions.
- **Role**: Lead front-end developer responsible for building the dashboard from scratch, developing a user-friendly and intuitive interface, and ensuring smooth integration with the back-end. Implemented reusable components for scalability and maintainability, and used secure authentication and role-based access control.
- **Technologies**: Next.js, Tailwind CSS, RTK Query, NextAuth, Formik, Yup, React-Hot-Toast.

AFG Construction
Sep 2024

- Designed a landing page, increasing lead generation by 30%.
- Implemented a messaging feature, boosting inquiries by 20%.
- Built a bilingual content dashboard, reducing update time by 60%, speeding up content publication.

AFG Construction Dashboard
Sep 2024 – Oct 2024

- **Description:** A custom-built dashboard for managing content, projects, and communication requests on the AFG Construction website. Includes features for adding projects, images, and videos, as well as tracking user engagement and managing communication inquiries.
- **Role**: Lead front-end developer responsible for designing the user interface, implementing content management features, and integrating authentication. Ensured secure role-based access control with specific permissions for Admin, Editor, and Customer Service roles.
- **Technologies**: Next.js, TailwindCSS, RTK Query, Formik, Yup, NextAuth.
